

Kalika

The Ultimate in PBX Door Access Control

Ulydor Systems

kalika

Ulydor

Ulydor stands head and shoulders above other door entry systems and offers exceptional value. Its unique modular system means Ulydor is flexible, adaptable and highly sophisticated yet it is easy to install and operate.

Key Features

- Unique modular system.
- Simple to install & operate.
- Versatile 0-64 button configuration.
- Keypad entry & telephone dialling.
- RFID access control.
- PBX enabled.
- Works on any 2-wire analogue or SIP extension.
- DECT option available for wireless connection.
- Analogue or IP camera options.
- Accredited by most major telecom manufacturers
- Expandable and upgradable.
- Remote programming.

Totally Flexible

Ulydor can be customised to suit virtually any application. Offering up to 64 dedicated buttons means Ulydor is ideal for easy management of multiple occupation office blocks or large industrial units with multiple entrances.

Any member of staff can intercept the caller and activate the door entry using their telephone handset.

Ulydor is fully operational 24/7 by using the ability to switch to night service at the end of the day and with the buttons and nameplates being backlit.

Higher Security

The analogue camera module option allows the occupant to view the caller, and with the IP or Wi-Fi camera option, images can be viewed on any networked PC screen, PDA or even a mobile phone.

Easy Installation

Ulydor is easy to install as it only needs a 2-wire analogue or SIP extension to integrate fully with PBX telecom systems. If there is no cable access the GAP compatible cordless solution will solve the problem.

Once installed, it is very easy to expand or upgrade, making it virtually future proof.

Ulydor can be reprogrammed remotely, so even changing access rights is simple.

Fully Compatible

Ulydor is compatible with almost all telephone systems and works with all standard and magnetic door locks.

Conforming to international standards, the Ulydor system is accredited by major telecom manufacturers such as Avaya and Splicecom, also approved by Panasonic, NEC, Inter-Tel and Shoretel.

No other door access control system can provide the flexibility and sophistication of a Ulydor solution.

With its ease of use and installation, it really is a remarkable but cost effective answer to any door access application.

Also Available in heavy duty anti vandal finish.
